Rodenberg introduces new Premium-Edition onto the market

Door panels follow current design trends

The Rodenberg Türsysteme AG continued to develop their panel range in the Premium segment, in order to open new customer capacities for

themselves and their sales partners. With 34 new models the company sets focus on timeless modern design and meets the concerns of actual trends - from integrated external handles via high-grade steel pilaster strips and crosswise veneer wood decors up to surfaces with partial foil coating or high gloss decor. Descriptive the current Premium

edition is presented in the separate novelty catalog 2011, which is to all Rodenberg customers immediately at the disposal for the daily sales work.

Design handles and grip plates perfectly integrated

During developing the new Premium-Edition Rodenberg has taken up the increasing wish for doors with clear, reduced forms and lines. The results are 34 PVC and aluminium attachment door panels that follow a highly intentional design idiom and captivates by its plain elegance. The timeless modern design of the panels is emphasized by the integrated design-handles and embedded stainless steel grip plates. The both simple and noble

exterior handles are formally and stylistically manufactured according to the panel design, so that panel and handle always form a harmonious unit. Besides from the basic idea, to produce exterior handles and door panel in one piece, attractive models with flush integrated hand grip elements were developed.

Elegant look due to curved pilaster strips

Filigree stainless steel pilaster strips remain an important design topic for designing the entrance door. The wide model range of the premium edition shows in how many ways these popular design elements can be used. Here are on the one hand panels that are arranged by straight-lined, vertical or horizontal pilaster strips, in order to lend a clear optic to the entrance area. All glass side lights with sand-blasted decor glazings, in which the alignment of the pilaster strips decently continues, complete the optical general impression perfectly. On the other hand elegantly swung pilaster strips determine the design of different closed panel variants and form in interaction with puristic grip caps a formative unit. Pilaster strips made of stainless steel improve the door optically as well as haptically, because they rest slightly raised on the panel surface.

Partial areas ennobled with high polished decor

Following current trends from the furniture and interior door industry, Rodenberg offers for quite some time entrance door panels with partial high gloss coating, that have become increasingly popular. For this reason the company continued to

develop its panel offer also within this range. Thus now models are available, which are partially ennobled by. The high gloss painted fantasy decor captivates by a lively, lengthwise veneered structure and a pleasantly warm color. Thus the partially applications form a beautiful contrast to the white or colored attachment panel.

Crosswise veneered wood decors become a trend

Its design competence and innovative spirit Rodenberg can also prove by models with crosswise veneered wood decors. With these panel versions the horizontal structure is additionally punctuated by horizontal pilaster strips or grooves. For the design of the surface alone 115 decors and color foils of all prominent manufacturers stand to the selection. Also parts of the panels can be accented with decoration foils. Long grain and and crosswise veneered partial wood decor applications in combination with white or colored painted panels open an abundance of individual design possibilities to the customer.

Raised stainless steel frames as design elements

Graceful designed, raised ornamentation frames made of stainless steel in combination with filigree stainless steel decorative brackets are elementary design components of further newly developed entry door panels with long, narrow light cutouts. The frame bent easily diagonally to the long side of the glass produces an aesthetic depth effect and lends to the entry door thereby one expressed elegant
